THIRD PARTY GRADED COINS & CURRENCY

The coin market is speculative and unregulated. Many areas of numismatics lend themselves to third party grading and authentication. Such certification does not eliminate all risks associated with the grading of coins and currency. Grading is a subjective matter and opinions as to the grade of a certified or uncertified item can differ. Items graded by the various services carry the guarantees, if any, of that particular service. Securing performance on any such guarantee is strictly between the purchaser and the particular grading service. Coast to Coast may or may not agree with the grade assigned by the particular grading service. Buyer should be aware that grading standards of coins have changed from time to time in the past and may do so again in the future.

— Carson City Mint Gold Coins —

The Comstock Lode of silver was discovered in 1859 & the Carson City Mint was created in 1863. Operations didn't start until 1870 & ran until 1885. They resumed operations in 1889 & permanently closed in 1893. The mint was established to strike silver coins but also struck gold coins, with a total face value nearly equaling the silver production. All the gold coinage is scarce and very popular with modern day collectors.

We are delighted to present our current inventory of these important coins!

Five Dollar Gold Coins

1871-CC. PCGS. AU-55. Lustrous yellow-gold surfaces and well detailed with just a touch of wear. Scarce in any grade as just 20,770 were minted and most the survivors are well worn. PCGS has graded just 9 coins finer than this example: 7 AU-58, 1 MS-61, 1-MS-62. . . . . #230678 **$22500.00**

1875-CC. PCGS. F-15. CAC. Very nice for the grade with proper detail and minimal marks. Scarce in any grade with just 11,828 minted. . . . . #233403 **$3875.00**

1876-CC. NGC. Genuine. XF Details. Obverse Damage. . . . . #236813 **$5995.00**

1884-CC. NGC. AU-55. Brilliant yellow-gold surfaces exhibit nearly full luster and few marks that are only minor and of no significance. The strike is solid & distinct. Only 16,402 pieces were produced & this example has a lofty grade for the issue. Only 7 coins have graded MS at NGC—all MS-61. . . . #237328 **$6495.00**

1893-CC. NGC. MS-61. Well struck with deep gold luster. A better 'Five' from the popular Carson City mint. . . . . #230682 **$3695.00**

Ten Dollar Gold Coins

1871-CC. NGC. XF-45. Just 8,085 coins minted during the second year of operation at the Carson City Mint. About 100 are known. This example has strong detail & a glimmer of luster remaining on orange-gold surfaces. . . . . #234943 **$18995.00**

1872-CC. PCGS. VF-30. Pleasant yellow-gold surfaces that exhibit solid detail & an even strike. The look is quite clean w/no marks of major significance. Seldom seen in any grade as only 4,600 pieces were struck. No more than a handful of coins have graded at any particular grade level. Only 1 coin, an NGC-62, has graded mint state at both services. This issue is considered only slightly less rare than an 1878-CC Eagle. A great opportunity to acquire a sought after date in a very desirable grade.. . #238812 **$13250.00**

1878-CC. NGC. AU-53. Attractive yellow-gold surfaces that exhibit ample remnant luster and a strong strike. The look is far cleaner than would be expected. Marks are few and minor with none of significance. The 1878-CC is among the rarest eagles from not only the Carson City Mint but also in the entire $10 eagle series. Of 3,244 pieces minted, only a scant 60-75 pieces are believed to still survive. Only 12 pieces have graded finer at NGC with the highest graded being a single MS-61 example. Pieces seldom turn up & are avidly sought when they appear. A prime selection and addition to any advanced collection. . . . . #238774 **$32500.00**

1880-CC. PCGS. AU-53. Brilliant yellow-gold surfaces exhibit ample remnant luster and a sharp strike. Marks are minor and of no major significance. A scarce Carson City Mint issue with a production of only 11,190 pieces. A lofty grade for the issue as only 4 coins have graded mint state by PCGS, the highest grade of MS-61 given to 2 pieces. Very desirable. . . . . #238560 **$4750.00**

1882-CC. NGC. AU-55. Brilliant yellow-gold surfaces exhibit ample luster and a nearly mint state look. Marks are minor with none of significance & the strike is solid. A very scarce date with only 6,764 minted. Only 5 pieces graded mint state at NGC, the highest being 2 pieces graded MS-62.. . . . . #238548 **$11895.00**

1890-CC. PCGS. AU-58. Lustrous yellow-gold surfaces that are just shy of mint state. The look is clean and pleasing. A popular date that saw a mintage of 17,500 pieces. . . . . #233742 **$4095.00**

1891-CC. NGC. Genuine. Uncirculated Details. Obverse Scratched. . . . . #237751 **$1995.00**

1891-CC. PCGS. MS-61. Brilliant yellow-gold surfaces and a sharp strike. Very lustrous for the grade. Desirable date! #224140 **$2695.00**

1893-CC. PCGS. AU-58. On the cusp of being mint state with a beautiful apricot tint resting upon lustrous surfaces. The look is clean with very few marks and none of any significance. The strike is sharp and distinct. The last year for the Carson City Mint and a mintage of only 14,000 pieces. Seldom seen in any grade with only 11 pieces graded mint state at PCGS and none higher than MS 62 at either service. . . . . #238486 **$10695.00**

Twenty Dollar Gold Coins

1872-CC. PCGS. AU-55. From a mintage of just 26,900. This is an attractive Choice AU with vibrant orange-gold luster and almost no sign of wear. The surfaces are nice and less abraded than normally seen on this scarce Carson City 'Twenty'. Housed in an older PCGS holder. . . . . #234985 **$19950.00**

1875-CC. PCGS. MS-61. CAC. Well struck with very flashy original gold luster off semi proof-like surfaces. Outstanding for the grade with far fewer marks than typically seen. A very tough find with CAC approval as nearly 400 have graded MS-61 at PCGS and NGC with just 20 gaining a CAC sticker! . . . . #226610 **$11995.00**

1877-CC. PCGS. XF-40. Well detailed with nice original surfaces. . . . . #222973 **$3495.00**

1877-CC. PCGS. XF-45. Strong detail and original with a trace of luster remaining. . . . . #236253 **$3895.00**

1885-CC. NGC. AU-53. CAC. A Carson City mint rarity with a mintage of just 9,004. This is an attractive example with strong detail, lustrous surfaces, and just light wear. . . #237198 **$18750.00**

1889-CC. PCGS. XF-40. From the popular Carson City mint with a mintage of just 30,945. . . . . #236254 **$3895.00**

1892-CC. PCGS. AU-58. CAC. Nice original lustrous surfaces and a sharp strike. Just 27,265 minted with this example being just a breath away from a mint state designation. . . . . #227219 **$8995.00**

1871-CC. PCGS. MS-61. The Carson City Mint struck Seated Liberty Dollars during the final 4 years of the series with 1871-CC having the lowest mintage at just 1,376 coins. This beautiful example has rich varied golden toning w/frosted design features and vibrant luster off semi proof-like surfaces. The strike is sharp with minimal marks and strong eye appeal. The PCGS population for MS coins is 2 in MS-61 & a single MS-64. This coin last sold publicly as part of Stacks 2011 ANA sale where it brought $126,500. We are delighted to offer one of the finest known examples of this classic rarity! . . . . #238551 $109000.00
1872. PCGS. MS-64. NIce crisp white surfaces exhibit strong luster & a sharp strike. Marks are minimal and of no significance. While 1,105,500 pieces were struck, examples are scarcer than the mintage suggests & MS coins are quite elusive. Only 4 pieces have graded numerically finer at PCGS. . #231682 $5575.00

1873-CC. PCGS. MS-61. Only 2,300 minted with most melted and an estimated 750 to 1,000 pieces actually released into circulation. This is the second rarest With Motto Seated Dollar after the 1870-S. The present coin is extremely well struck with attractive lightly toned surfaces that exhibit orange and gold hues surrounded by a touch of turquoise at the perimeter. The few minor marks that define the grade are insignificant and don't distract from this coins excellent eye appeal. The PCGS population report shows just 4 mint state coins: one MS-60, one MS-64, one MS-65, and this MS-61 which is fresh to the market. A truly classic rarity for an advanced Seated Dollar collection! #238552 $125000.00

1793 Half Cent

PCGS. XF-40 CAC

The first coin struck at the United States Mint along with the 1793 Chain Cent. Coins with nice color & surfaces & perfect planchets are nearly impossible to find. This is just such a coin with strong detail and beautiful smooth light chocolate brown surfaces that are virtually pristine. A classic piece of early American numismatics that will be a cornerstone in the collection of the next owner!

Only $27,950.00 #238835

1851-O Seated Liberty Quarter

NGC. AU-53

Just 88,000 minted with a very low survival rate. It is likely that many were melted after the weight of silver coinage was reduced in 1853. This is an attractive example with sharp detail and lustrous light silver-white surfaces. Only 7 coins have graded finer at NGC with this being the only AU-53 graded. Its pedigreed to the T. James Clarke sale in NYC in 1978.

1857 Seated Liberty Quarter

PCGS. PR-65

A beautiful Gem with rich steel-blue toning and an underlying rose hue. The strike is razor-sharp and the surfaces are exceptionally nice. Fewer than 100 were minted and this was the final year before proofs were minted in larger quantities and sold to the general public. Tied for the finest graded at PCGS and the coin photographed for use on the PCGS CoinFacts site.

1885 $1 Gold Coin

PCGS. PR-66 Cameo

A simply stunning beauty. A faint hint of orange and green rests upon blazing yellow-gold surfaces that provide excellent contrast for frosted design elements. The strike is razor-sharp. Rotating the coin at slightly different angles and distances produces differing effects; all of them amazing. Only 1,105 were minted & this example is amongst the finest. Sure to please.

Only $14,250.00 #238762

1825 $2 1/2 Gold Coin

NGC. MS-61

Brilliant yellow-gold surfaces with strong full & frosty luster that displays some reflectivity on the obverse. Marks are minor & of no significance. The strike is quite strong. Struck in an era of low mintages with only 4,434 pieces produced. Few pieces were saved & mint state examples are seldom seen. Only 12 pieces have graded finer at NGC, including a single MS-65 & a single MS-66. A beautiful example of this scarce 'Capped Bust' type.

1908 $5 Gold Coin

NGC. PR-64

Along with it's quarter eagle counterpart, this issue is remarkable for it's first use of an incused design and a sandblast or 'matte' finish rather than a polished appearance. This example ideally illustrates a strong matte finish & razor-sharp strike. Yellow-gold surfaces exhibit only the tiniest of marks that are well within the definition of the grade and fail to distract. Only 167 pieces were minted. While matte pieces were not considered very desirable by most at the time, they are highly sought after today.

1857-O $10 Gold Coin

PCGS. AU-50

Only 5,500 minted and truly scarce in any grade. The vast majority of known pieces grade VF-XF. This is an attractive AU with strong detail and lustrous surfaces. Additionally, this example doesn't have the heavy gouges that tend to plague early 'O' mint gold.

Only $10,395.00 #238842

1927 $20 Gold Coin

NGC. MS-67

Gorgeous orange-gold surfaces that exhibit touches of light green patina and a very sharp strike. The surfaces are nearly mark-free and the look is outstanding. A truly splendid example with nothing graded finer at NGC.
