THIRD PARTY GRADED COINS & CURRENCY

The coin market is speculative and unregulated. Many areas of numismatics lend themselves to third party grading and authentication. Such certification does not eliminate all risks associated with the grading of coins and currency. Grading is a subjective matter and opinions as to the grade of a certified or uncertified item can differ. Items graded by the various services carry the guarantees, if any, of that particular service. Securing performance on any such guarantee is strictly between the purchaser and the particular grading service. Coast to Coast may or may not agree with the grade assigned by the particular grading service. Buyer should be aware that grading standards of coins have changed from time to time in the past and may do so again in the future.

— Bust Half Dollars —

Bust Half Dollars were minted from 1794 to 1839. They were the workhorse of our economy as silver dollars weren't produced for circulation from 1804 to 1839. There are several different types and sub-types and many interesting varieties.

We are pleased to offer a nice selection of these popular coins.

- 1851. PCGS. PR-64. CAM. CAC. Restrike. No 'original' proofs for 1851 have ever been graded at PCGS & it is widely believed that

none were ever minted. The U.S. Mint did make a few of these 'restrikes' for collectors in the late 1850's and 1860's and it is estimated that 40 to 60 are known. The present coin is exceptional for the grade with strong 'cameo' contrast & a precise strike. The deep mirrored fields are very flashy with a light smoky-gold hue while the design elements have nice silver-white frost. The eye appeal is outstanding. We are delighted to offer this important numismatic rarity! #231089 \$39995.00

- 1853. NGC. PR-61. A beautiful example that illuminates with subtle blended gold and gunmetal blue shades resting upon delightful silver-gray surfaces. Marks are minimal and well within the allowance for the grade. With 1 exception, all known proofs of this date are believed to be restrikes with a total of 12 pieces struck. - 1855. PCGS. PR-64. A very scarce & underrated proof w/an estimated 40 to 60 known. This is a very attractive coin with flashy mint luster and a faint champagne glow. - 1856. NGC. MS-64. Lustrous rich original surfaces exhibit a light blend of blue-gold shades and a solid strike. An issue with a mintage of 63,500 that is far scarcer than the numbers might suggest. An important & highly desirable Seated Dollar. #237480 \$12950.00

1910. NGC. PR-65. The proofs of 1909 and 1910 were made with a 'Roman' or satin finish to improve sales with contemporary collectors who didn't like the matte proof finish of 1908. These coins turned out to be equally unpopular with collectors who were used to proofs with mirrored fields that contrasted with raised design features. The mint returned to matte proofs for 1911-1915. This coin is outstanding w/the squared rims & striking characteristics that are diagnostic of these beautiful proofs. A wonderful orange-gold patina coats wonderful satin surfaces. With an incused design, the delicate surfaces are exposed and few have survived as well preserved as this amazing coin.
